CAL-PAK
PACKAGING AUTOMATION GROUP

PACKAGING AUTOMATION GROUP

Cal-Pak's automation group is a full-service supplier of packaging equipment, specializing in secondary packaging machinery for the food, beverage and personal care industries.

PRODUCT INSPECTION

A full-range of equipment for product inspection ensuring state-of-the-art contamination detection, accurate weight tolerances and product container and label integrity are met on each container.

- Checkweighers
- Metal Detectors
- X-Ray Systems
- Vision Inspection Systems

PALLET EQUIPMENT

Whether you are removing products from a pallet, loading product onto one or wrapping a stocked pallet, our line of pallet equipment has a solution for you.

- Palletizers • Depalletizers • Pallet Wrappers

CASE ERECTORS & SEALERS

Equipment range includes medium and high-speed designs for RSC, HSC and tab-lock style cases. The robust equipment platforms will operate within an automated production line in three shift operations.

- Case Erectors
- Case Sealers
- Uncasers
- Partition Inserters

CASE PACKING EQUIPMENT

Our Case Packing equipment includes intermittent and continuous motion machines. These can be configured for wrap around, KD end load, RSC top or bottom load or tray case designs.

- Wrap Around Packers
- Top & Bottom Loaders
- Tray Packers
- Tray Shrink Packers

CARTONERS & SLEEVERS

The line of cartoners and sleevers we offer provides solutions from a simple hand-load cartoner to a complex, high-speed, cup-over-cup sleever. Infeeds are customized to meet the product and pack pattern requirements at low, medium or high speeds.

- Intermittent Motion
- Continuous Motion

SHRINK BUNDLERS

Cal-Pak's line of shrink wrappers for both tray and loose products is available in single or dual roll formats. Bundlers are available with integrated or stand alone shrink tunnels.

- Single Roll Wrappers
- Twin Roll Bundlers

LABELING SYSTEMS

The labelers we offer span the complete range of application requirements from a simple mid-speed applicator on a stand to a high-speed, complex rotary system.

- In-line • Stand Alone • Rotary

INDUCTION CAP SEALERS

The induction sealer series provides options for desktop cap sealers up to high-speed inline systems. We offer a number of sealing head designs to accommodate any style cap design.

- Stand Alone
- Hand Held

Visit cal-pak.com for a complete list of the equipment we offer.

PRODUCT IDENTIFICATION GROUP

Cal-Pak's product identification group specializes in primary and secondary identification.
We offer a variety of coders and labelers for coding and marking on any material.

LABELING SYSTEMS

Our line of Print & Apply Labelers is available in different configurations for both standard and customized models. The most common is a simple tamp applicator for label placement to the top or side of a shipping case.
Custom P&A Models:
- Pail & Drum Labeling
- Bottom Labeling
- Front/Back Labeling
- Wrap Around Labeling
- Orienting Thermal Transfer Labeling

L-SEALERS

- Automatic
- Semi-Automatic

Cal-Pak's range of L-sealers includes semi-automatic and automatic options. The semi-automatic models create a professional looking package at a manageable cost. Our fully-automatic models can be equipped with infeed conveyors for loading products prior to the L-Sealer, which is then fed from the conveyor automatically.

SHRINK SLEEVE LABELERS

We offer shrink sleeve labelers suitable for tamper evident or full body labeling. Systems range in speed from 100 to 300 products per minute. Radiant and steam tunnel models are available to ensure your sleeve is properly shrunk to your product; attaining a quality look for your brand.

- Sleevers
- Shrink Tunnels

CONSUMABLES

We stock a complete line of inks and solvents for our coders and provide a wide range of labels and ribbons for our Print & Apply Labelers.

- Ribbons
- Ink & Solvent
- Labels

CUSTOMER SERVICE

Cal-Pak offers a variety of support for our products:
- Preventative Maintenance programs
- Annual Blanket Order programs for consumables
- Field Service from a factory trained and certified technician
- In-house Repair Facility for certain items that are not cost effective to repair in the field

CASE TAPERS

Our semi-automatic case sealers use 2" or 3" pressure sensitive tape to seal tops and bottoms of RSC corrugated cases. To accommodate a wide range of case sizes and weights they are available with bottom belt, side belt or top & bottom belt driven designs.

- Top & Bottom Belt Tapers
- Bottom Belt Tapers
- Side Belt Tapers
- Random Side Belt Tapers
- Semi-Automatic Case Erectors

PRODUCT CODERS

With a line of both small character and large character coders, we have the right solution for any coding requirements. We offer both a traditional CIJ and HP TIJ for small character coding.

Our large character options include high-resolution coders for alphanumerics and barcodes on corrugated cases and DOD coders for simple coding on porous substrates. Our multi-head TIJ coder is perfect for multi-lane vertical baggers and our UV curable coder will produce high-resolution code on any surface.

- TIJ Coders
- CIJ Coders
- High Resolution Coders
- Valvejet Coders
- Small Character Coders
- Large Character Coders

CAL-PAK, INCORPORATED
PACKAGING SOLUTIONS

Cal-Pak specializes in secondary packaging equipment and supplies for the food, beverage and personal care industries, among others. We remain at the forefront of technology in the packaging industry to bring our customers the best solutions available for their packaging needs.

We realize you have a choice of packaging equipment and the company that provides it. We work hard every day to earn and keep that trust.

CAL-PAK PACKAGING AUTOMATION GROUP

The Packaging Automation Group provides automation solutions for end-of-line packaging applications.

Solutions can comprise a single machine adapted to an existing packaging line to a partial or full packaging line design, integration and installation.

Equipment is expertly selected based on your application requirements, expectations and budget to deliver the optimal solution for your application and need.

CAL-PAK PRODUCT IDENTIFICATION GROUP

The Product Identification Group specializes in primary and secondary identification.

Cal-Pak offers a variety of coders and labelers for coding and marking on any material. Our CIJ coders offer a wide range of ink types and colors for applying small character codes. We also offer TIJ coders for lower-volume, small-character applications.

Our large character case coders include high resolution, DOD and TIJ technologies for applying alphanumeric codes, barcodes and 2D codes.
